

ICE Coffee/Tea Stainless Steel dispensers

The dispensers are portable, can easily be transported to a refrigerated environment. The system includes a single compartment ice bucket which is designed to fit into the dispenser to hold ice for quick chill brewing process and keeping the coffee or tea beverages chilled. The ice bucket is easily removed from the dispenser for refilling to handle the ice brewing process. All of the dispensers have a lid designed to maintain sanitation of the coffee or tea in the dispensers.
