PORTAFILTER CLEANER

Q20 is the automatic portafilter cleaner for the barista of the future. It ensures the filter is cleaned immediately, without needing to bang it with one's arm, thus avoiding noise, any physical effort and above all without damaging or undermining the seal of the portafilter, which is an essential tool for the espresso barista. The Q20 line offers three types of models to meet the diverse needs of every barista.

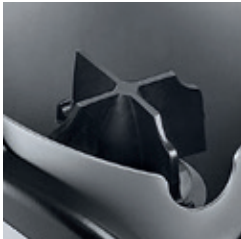

Q20 – 3
