

VIVREAU[®]
ADVANCED WATER SYSTEMS

V3-204

MINI BOTTLER

Re-usable glass bottler | V3-204

- * Dispenses chilled, still and sparkling water
- * Substantially reduces costs of purchasing pre-bottled mineral waters
- * Re-usable glass bottles in 425ml, 500ml, 750ml and 1 liter sizes
- * Bottles can be personalized
- * Save the environment - eliminate regular deliveries as well as the disposal of empty bottles and packaging
- * High performance ice bank refrigeration system capable of delivering very high volumes of chilled water at low temperatures, particularly at peak demand times
- * Eliminate any storage issues
- * Purpose designed bottle washing trays designed to fit most commercial dishwashers
- * Removable tap nozzles for ease of cleaning and sanitizing

MINI BOTTLER

North America V3-204 Specification Sheet

Product Dispensed:

Advanced micro-filtered, chilled still and sparkling water

Application:

For the purpose of filling Vivreau re-usable glass bottles

Equipment Dimensions:

- * Width 14 5/8" Inches
- * Depth 20 3/4" Inches (drip tray to rear overflow)
- * Height 18" Inches (to top of cabinet)
- * 21 1/4" Inches to top of dispense tap

Please note that the system is installed as a Countertop unit. Alternatively it can be installed as an Under Counter system.

Under-counter: (alternative option)

Base unit is installed beneath the work surface with the dispense tap and drip tray fitted to the work surface immediately above. Refer to Bottler V3-205 specification sheet.

The following services are required to be supplied by the customer and must be available prior to installation:

- * 1 potable 1/2" cold water supply terminating in a 1/2" ball valve, 1/2" female pipe thread. (Ball valve must be accessible for service and installation) *The Vivreau system incorporates back flow prevention, any additional back flow devices required by local or state code must also be supplied by the customer prior to installation. There should not be any other filters/pre-filters before the Vivreau system.
- * Minimum water pressure 50 PSI
- * Minimum water flow 80 Gallons per hour
- * 15amp electrical receptacle (5-15 R) 120v/60hz (8 amps)
- * CO2 - (customer supplied) CO2 must be available for installation

*If connecting to a bulk or existing CO2 system a CO2 line terminating at a 1/4" barbed shutoff valve must be available within 40" of the Bottling System installation site, 100psi minimum pressure.

Water Supply
1/2" Threaded Ball Valve

CO2 Supply
1/4" Barbed Shutoff

Location of Services: (all services must be accessible for installation and service)

- Please ensure all services are kept within 40" of bottling system
- Water shut-off valve to be located at low level. Please ensure that there is sufficient room for a 12" inch long fitting to be connected to the shut-off valve.
- If the water and CO2 are to be installed in an enclosure below the counter we will require a 1" hole to run water and CO2 to the countertop unit.

Insulation:

Please ensure that all water pipes feeding the Vivreau System are correctly insulated to ensure that the water does not heat up within the pipes prior to entering the Vivreau system. This is essential for water quality reasons.

If the system is to be installed in an enclosed space, adequate ventilation must be provided.
